

Multi Format Retractable Motorized Tensioned AT Screen (MFR)

Both HD and WS formats from the same retractable AT screen

If you would like to integrate a Home Cinema into your living space, a Retractable Motorised Acoustically Transparent screen will provide an elegant solution. This popular screen is now also available with motorised masking!

From its discreet housing, the screen glides into position, deploying its projection surface and masking automatically via your control system. And because it is Acoustically Transparent, the screen can be mounted directly in front of the main speakers.

Screen Excellence Retractable Acoustically Transparent screens have been engineered to have both perfect picture quality without any reflections and shadows, while allowing the sound to pass through them with a minimal (<2.5db) insertion loss.
