

4-Way True Aspect Masking (TAM 4)

Maximum view size with any aspect ratio!

To achieve the optimum framing for every imaging aspect ratio, the True Aspect Masking 4 offers both vertical and horizontal masking. The height and the width are both variable according to the required aspect ratio, maximising the viewable area.

This provides a projection surface constantly and accurately bordered with black edges, enhancing the contrast and giving a real focus on the image.

Utilising the elegant decorative frame made popular by our Reference range to offer a sleek appearance, the TAM-4 screen will integrate with your decor seamlessly, allowing, discreetly, a fully automated operation of your Home Theater.
