

Vista Curve

The world reference in
Acoustically Transparent screens

VistaCurve curved fixed-frame acoustically transparent projection screens provide the perfect surface for images projected through an anamorphic lens.

Ideal cinematic projection is achieved only with CinemaScope aspect ratio, which is the format adopted for production of most movies. The unique immersion provided by the widescreen imaging is further enhanced by the screen curvature and the edges defining a more life like space.

Perfectly correlated to anamorphic projection, the VistaCurve affords four matched radiuses according to the actual size of the screen.

Using the Enlightor Neo surface for no-compromise Home Cinema performance. Once seen, the VistaCurve is a screen you won't want to live without.

Technical info:

Fully 4K and HDR compatible

Surface:

Enlightor Neo and Enlightor Neo-W

Frame:

High grade Aluminium frame with
InfiniteBlack velvet finish

Standard Sizes:

HD up to 210" / 5334mm base width
WS up to 210" / 5334mm base width
Custom sizes and aspect ratios available
upon request

HD Aspect Ratio: 1.78:1 (16/9)

WS Aspect Ratio: 2.35 - 2.40:1

Advanced features:

- Custom sizes available within these limits
InfiniteBlack velvet frame finish for ultra-ab-
sorbent black borders
- Hand crafted with care in United
Kingdom
- Acoustically transparent Black Backing
included as standard.
